

Jacob Black Book Report: Escape from Reason by Francis Schaeffer

Originally published in 1968, Schaeffer demonstrates in this book that he foresaw the trends of today's culture (subjective truth, the abolition of man, postmodern thinking) over 60 years ago. He traces these trends to show where they have come from and where they were taking us. The author's foresight of these issues is impressive.

He comes from a Christian worldview and offers a way forward that he hopes will help the people of God overcome these cultural trends. This book is short but penetrating. Schaeffer can be a bit academic, so be prepared to read and reread and meditate on his words.
